The information below is also included on the back of the Pattern Envelope.

Batting: 25" x 27"

Pellon Lightweight Fusible Interfacing: P44F or P911FF are good options. [This fusible interfacing will be used to fuse onto the back of the quilt top for stability & better stitch tension during applique process. Pieced size: Approx. 25" x 27"

(If the fusible interfacing you have is narrower than the dimensions given here, it can simply be pieced together and then fused to the back of the quilt. Do NOT use a heavy weight interfacing; Lightweight is best for this.)
